REMARKS

The figures of births and deaths shown in this statement for week ending the 14th January, 1956, relate to 207 towns with an estimated population of 30,843 thousands. The total number of towns is 313 and their population is 41,203 thousands. Thus 66% of the total number of towns representing 75% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 16,685 and 6,057 representing birth and death rates of 28.1 and 10.2 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 166 towns with an estimated population of 25,224 thousands. Information about Ajmer, Assam and Madras could not be included. The total number of towns is 251 and their population is 33,402 thousands. Thus 66% of the total number of towns representing 76% of the total population is covered. The number of births and deaths recorded in these

towns were 13,872 and 5,344 representing birth rates and death rates of 28.5 and 11.0 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(B) States (Part B).—The data here relate to 41 towns with an estimated population of 5,519 thousands. The total number of towns is 62 and their population is 7,801 thousands. Thus 66% of the total number of towns representing 71% of the total population is covered. The number of births and deaths recorded in these towns were 2,813 and 713 representing birth and death rates of 26.5 and 6.7 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
